(1)

Filler Therapy
Long Lasting Filler
(2)

Filler Therapy
Lifting Milk
(3)

Treatment duration:
30 minutes

Bowl and brush

Who is suitable for?

To clients whose hair is **stressed, brittle, unstructured**, due to various causes including aggressive bleaching, repeated perms or frequent use of hairdryers and straighteners.

What's inside and what it does?

- **Collagen:** fibrous protein responsible for tissue and hair firmness.
- **Elastin:** elastic protein responsible for the hair's elasticity.
- **Phyto Stem Cells:** they help produce the hair's fundamental substances.
- **Keratin:** main protein that makes up the hair.

Maintenance at home

We recommend using the **Filler Therapy Restorative Line** consisting of Restorative Shampoo, Conditioner and Lifting Mask.

FAQ

- **How often should I repeat the treatment?**
Every 4 weeks for 12 weeks.
- **After how long can I see the results?**
Within 3 applications and therefore 3 months, the hair will be almost completely rebuilt.
- **Is it suitable for thin hair?**
Absolutely yes. The Nashi Filler Therapy treatment is also suitable for fine, particularly weakened and stressed hair.
- **Does it lighten the hair color?**
No.
- **Is it a moisturising treatment?**
No, it is a treatment that plumps the hair by giving it structure; in the case of extremely dehydrated hair the ideal solution is Deep Infusion.
- **Is it better to use a cap and place it under a heat source or dry it all before rinsing?**
Using a cap or foil allows more moisture to be retained in the hair, however drying them all before rinsing improves product performance.
- **Can I use hair coloring on the same day as the treatment?**
Yes, see the back of the sheet to find how to use the Filler Therapy treatment combined with coloring.
